Benefits of having a Maths Specialist on your Staff

- Are you passionate about providing Maths **CPD** for your teachers?
- What's on your long term strategic plan to develop **Maths** in your school?
- Are you keen to **empower** your staff and improve **retention**?

Why not support your experienced staff to become a **Local Leader of Maths Education**? It's great for both their CPD and your Maths department!

We facilitate national CPD programmes to train teachers to lead high-quality school and professional development for Maths.

So what's in it for you?

Listen to this Podcast to find out:

bitly

Working with NCETM
NATIONAL CENTRE FOR EXCELLENCE IN THE TEACHING OF MATHEMATICS

Case study:

Tony McGuinness, Headteacher, was initially skeptical about releasing his staff to train as an LLME because he believed that his school '*needed our teachers on front of the students for them to be in with a chance.*'

He soon saw the benefits:

- His staff applied their new learning across the whole department.
- Learning is based on expertise and evidence.
- His maths department is fully staffed with happy staff that work collaboratively.
- Staff are empowered by opportunities for professional development.
- The school's Ofsted rating rose to Good

Having seen the positive impact in his own school, Tony is now an advocate of his local Maths Hub and the LLME programme and promotes having local leaders of maths education in your own school.

Empower your staff now!

Share this flyer and support them to apply!
